Brief Description:

SECTION A: PROJECT IDENTIFICATION

PROJECT TITLE: Promoting Area Attractiveness through Hiking and Introducing a Different Touristic Approach

MIS IDENTIFICATION CODE: 5003444

PROJECT ACRONYM: P.A.T.H

Project duration

Start: 01/12/2017

End: 30/05/2020

Total Months: 29,97

CALL FOR PROPOSALS TITLE: 1st CALL FOR ORDINARY PROJECT PROPOSALS - PA 2: Integrated Environmental Management Cooperation Programme Interreg V/A Greece-Italy (EL-IT) 2014-2020 Co-financed by the European Regional Development Fund (ERDF)

CALL FOR PROPOSALS CODE: I1.2

COOPERATION PROGRAMME INFORMATION

PROGRAMME PERIOD: 2014 - 2020 CP CODE: 23

Priority Axis	2 - Integrated Environmental Management
Fund	ERDF
Thematic Objectives / Priorities	- 06-Preserving and protecting the environment and promoting resource efficiency
Investment Priority	- 6c-Conserving, protecting, promoting and developing natural and cultural heritage
Specific Objective	- SO2.1-Valorisation of cultural heritage and natural resources as a territorial asset of the Programme Area
Categories of Intervention	- 1007-Not applicable 24-Other unspecified services 7079-Access to public sector information (including open data, e-Culture, digital libraries, e-Content and e-Tourism) 907-Not applicable

Brief Summary of the Project (Suggested to be filled in upon completion of the Application Form)

P.A.T.H is based on the vision of touristic routes of different kinds (cultural, environmental, rural, etc), which in the recent years has been consolidated so as to reflect the evolution of the concept of such heritage and its projection in society. Considering the similarities that both countries present in terms of natural and cultural resources, as well as the low levels of innovation in the tourism sector, the project is based on cross-border cooperation for the connection of the participating areas using the historic, cultural and natural elements of both countries and promotion of a sense of common identity. The core of the project is the creation of innovative and sustainable thematic routes, linking visitors with Nature, using QR code signing, interactive maps and creating application for self-guiding touring in order to have a minimum intervene on the environment. Routes will be thematic in the means of: wetland routes, mountain trails and historical cultural trails. In that direction beneficiaries will: a) adopt customized Best Practices; b) develop and adopt well-suited governance tools c) promote local enterprises along their routes, d) valorize people's memories in the creation of new touristic spots, e) use storytelling as a means of creative tourism, f) organize activities for people with disabilities. The main outputs of the project will be the creation of 30 thematic routes in Greece and 21 thematic routes in Italy, the valorization of 150 QR sign codes and 5 customized routes in order to ensure accessibility for people with disabilities. PATH will benefit a wide range of groups such as public authorities, inhabitants of the Programme Area, local and international tourist operators, local population, people with disabilities, senior groups and visitors, by promoting responsible and community-based tourism, increasing the socio-economic benefits and raising awareness on environmental protection. The originality of the project lies on its approach on improving personalized experience, providing new tools and means that enable visitors, locals and users to record their stories, their interests making the experience of the thematic routes unique and thus more attractive to individuals. The added value results both from the personalized access and the promotion of integrated solutions that engage larger groups in the principle of sustainable and responsible management of tourism. P.A.T.H shall provide the Programme Area with updated and more attractive tourist destinations of high natural and cultural value, developing and testing at the same time innovative cross-border management plans and measures.

LEAD BENEFICIARY CONFIRMATION

By signing the Application Form the Lead Beneficiary hereby confirms that:

- The project has not neither will receive any other EU funding (except for the funding indicated in this Application form) during the whole duration of its implementation.
- The project is in line with the relevant EU and national legislation and policies of the countries involved.
- All Beneficiaries in the Partnership receiving funding from the programme are eligible bodies as defined in the programme.
- All Beneficiaries described in Section C of the Application Form are committed to taking part in the projects' activities.
- The information is accurate and true to the best knowledge of the Lead Beneficiary.
- The project budget and costs are in line with the limits set in the Call for Proposals.

SECTION H: CHECK LIST FOR SUBMISSION

We declare responsibly that the information contained in the proposal is true and accurate	Yes
--	-----

We confirm that:

S/N	QUESTION	ANSWER
1	The submitted Application Form and Annexes are the ones provided in the Call for Proposals.	Yes
2	The Application Form and all the documents provided as templates by the MA are submitted in the working language of the programme (English). All Beneficiaries participating in the project are listed in Beneficiary Section with their institution's name in original and English language	Yes

SECTION B - DETAILED DESCRIPTION

B.1 PROJECT IDENTIFICATION

B.1.1 Background and history of the project (problems/ challenges to be addressed/ target groups)

- Describe how the project idea and the partnership were developed
- What are the common Cross-border problems and challenges that will be tackled by the project? Please describe the relevance of your project for the programme area in terms of common challenges and/or joint assets addressed.
- What is the project's approach in addressing these common challenges and/or joint assets and what is new about the approach the project takes? Please describe new solutions that will be developed during the project and/or existing solutions that will be adopted and implemented during the project lifetime and in what way the approach goes beyond existing practice in the sector/programme area/participating countries.
- Which are the main target groups? Please describe who is benefiting (e.g. Beneficiaries, regions, end-users etc.) from the project and in what way.

The maximum total number of characters is 4500

(please do not exceed 1500 characters in each box)

In recent years a vision of touristic routes of different kinds (cultural, environmental, rural, etc) has been consolidated so as to reflect the evolution of the concept of such heritage and its projection in society. Primarily these routes are seen as a tool to highlight the value of cultural identity and to make it better known. Walking the route is more than a simple geographical displacement, it is a journey connecting nature to the past and the present, with the various elements that make up the route linking and interpreting it. These may be related to tangential issues, such as health or adventure, when it comes to routes that can be undertaken on foot, while providing creative leisure time pursuits that call for participation. At the same time, these routes are seen as a product aimed at a tourist market that can be used to build up a sustainable economy in the region. The economic value of this product will depend on how appealing it proves to be to potential users, i.e., the number of visitors it attracts, but also on the region's capacity to develop economic activity around the routes. In other words, adequate planning of the routes can help revitalise areas with limited development, especially if it is possible to achieve synergies between different areas and integrate them in regional planning managed at a supramunicipal level. Another characteristic typical of touristic routes is the intangible value of the product.

Paths, scenery, natural spaces and a region's cultural heritage are part of its collective richness. On the other hand, reusing the historical heritage in order to reactivate the local economy greatly influences the perception that local population could have about the project, which is a key factor in the promotion of its recovery and maintenance.

PATH project deals with the building-up of a methodological framework on how to develop and manage differentiated Touristic Routes (TRs) by making use of route development best practices and governance instruments targeted to foster sustainable tourism. Most TRs lack comprehensive methodologies and governance instruments to implement effective strategies at regional and inter-regional level.

The core of the project is the creation of innovative and sustainable thematic routes, linking visitors with Nature, using QR code signing , interactive maps and creating application for self-guiding touring in order to have a minimum intervene on the environment. Routes will be thematic in the means of: wetland routes (Aitolokarnania, Achaia, Ileia), mountain trails (Achaia, Aitolokarnania), historic routes- discovering ancient theatres (Aitolokarnania, Ileia), historical cultural trails discovering ancient sheep tracks and the natural heritage (Alta Murgia).

The draft methodology is intended to be tested by the project partners, while designing their TR Route Plans.

Number of characters 4380

They will: a) adopt customized Best Practices; b) develop & adopt well-suited governance tools c) promote local enterprises along their routes, d) valorize people's memories in the creation of new touristic spots, e) use storytelling as a means of creative tourism, f) organize activities for people with disabilities.

The overall purpose is to promote awareness of heritage and common identity in a way to converge with the challenges faced by European cultural identity and become elements of social cohesion and products bringing sustainable tourism to a wider audience. In this sense, the TRs have a transnational component & they highlight the notion of cultural exchange between nations, regions and communities.

The partnership of the project has been carefully created so as to engage a large geographical area of the Programme that includes a vast number of municipalities, protected zones, cultural heritage spots, local enterprises, etc.

During the preparation of the proposal a possible stakeholders and end-users assessment has been drafted, in order to identify main target groups which are Public and private entities with management capacity in this field or the ability to promote synergies among local actors. The project's innovation will also be useful and influential in several sectors like: travel agencies, tour operators and related; amusement and recreation activities; human health; sports and recreation education; cultural education, environmental protection, etc.

B.1.2 Objectives of the Project

What is the overall objective of the project and how does it link to the programme's objective? Specify one project main objective and describe its contribution to the programme priority specific objective.

The maximum number of characters is 2000

(please do not exceed 1000 characters in each box)

PATH'S overall objective is to develop joint cross-border initiatives within the involved areas for management and promotion of sustainable tourism based on common cultural and natural heritage. PATH deals with one of the major problems of both partner countries concerning culture & tourism sector - lack of an integrated management & promotion strategy of cultural and natural heritage and mainly insufficient involvement of community actors in valorisation activities.

Specifically the objectives are:

- 1) to reduce the seasonality in tourism demand through the valorisation of tourism products connected to the cultural and natural heritage
 - 2) to strengthen environmentally friendly tourism through the promotion of cultural and environmental tourist products' networks able to support tourist demand/supply
 - 3) to ensure a better integration of the ICT into the tourism policies dealing with mountain & rural areas or Europe, in order to improve the effectiveness of regional and local policies
-
- 4) to promote a better use and integration of information and communication technologies to within the tourism regional agenda
 - 5) to create a veritable learning framework, capable of transferring the existing partners' knowledge to less advanced regions of the consortium, through dedicated thematic workshops and study visits;
 - 6) to prove the sustainability and transferability of the projects shared among the partners through a light pilot action able to demonstrate the effectiveness of the selected measures to be reported in the final implementation plans of the partners
 - 7) to introduce active tourism as a new professional profile in rural areas by transferring an innovative, job-related and technology-enhanced vocational training product with special focus upon:- active tourism for the disabled and seniors; - responsible green tourism.
 - 8) to raise awareness amongst stakeholders in tourism and SME along touristic routes and other key actors

B.1.3 Expected outputs of the project (tangible and visible outputs or products relating to project activities)

Please describe project main outputs that will be delivered based on the activities carried out in the project. Please provide a short explanation on the defined specific objectives and their link with the project main outputs. Describe your project main output and its contribution to project specific objectives.

The maximum total number of characters is 2000

(please do not exceed 1000 characters in each box)

Number of characters 1963

The main outputs of the project are as follows:

- One Communication Plan (first draft at m2 + 1 update at m12) with analytical description of the project's communication objectives and activities, tools to be used in order to disseminate the results, outputs and achievements of the project proposal, given through a detailed time plan
 - One project portal in three languages + 5 social media accounts (facebook, twitter, linkedin, pinterest, Instagram). Creation at m 4 + 5 updates of the portal every 3-4m
 - One project logo, 3 banners, 5.000 leaflets and 4.000 brochures (2.000 in braille), 500 hats and bags, 10.000 maps
 - 2 press conferences • 5 press releases • 4 Promotional banners to electronic touristic sites • 2 Promotional banners in newspapers • One closing conference
 - 20 Community building events involving local stakeholders (cultural organizations, volunteer organization, N.G.O's)
 - Creation of 3 local support groups that will promote and adopt the created routes/trails
-
- 1 common study on the intervention area with description and documentation of at least 1500 PoIs
 - 30 proposed touristic routes in Greece and 21 routes in Italy (both areas)
 - 7 proposed tourist routes for people with kinetic problems and disabilities
 - 5 customized routes with small scale investments for people with special needs (e.g. accessible route for visually impaired, blind and differently abled people)
 - 150 signs with dynamic smart qr-code • 1 Web-based map platform in three languages • 1 Web-based crowd funding platform in three languages • 2 students contests for memories collecting to include in PoIs and create new if possible• Virtual tours and 3D models for each winning Point of Interest• Necessary Funds in the form of services to finance a renovation project
 - 1 evaluation platform for tourism stakeholders• 2 pilot walking excursions for professionals• 4 seminars for public administratives for the official presentation of the project

B.1.4 Expected results (direct and immediate effects resulting from the project)

What are

the project results? Describe their contribution and link (if applicable) to the result indicators of the Programme.

The maximum total number of characters is 2000

(please do not exceed 1000 characters in each box)

Number of characters 1976

PATH is a project focusing on the relationship between people and touristic sites, taking into account PATH's needs, rights and meanings. It fosters the improvement of natural and cultural spaces with consideration given to different attributes and aspects that should allow for good touristic sites. The main expected result of the project is the promotion of responsible and community-based tourism so that locals can enjoy increased socio-economic benefits and improved environment.

The principal expected results are:

- recovery and promotion of the historical, environmental and cultural peculiarities characterizing Greece and Apulia, flourished by individuals' experiences and memories, creating a stronger feeling of common identity and connection to the past
 - diffusion of the researches and studies by making them available on-line to a large public, so as to improve the information access capacity of tourism stakeholders to valid information about touristic sites
 - providing people with disabilities and kinetic problems the opportunity to enjoy hiking safe tourism by supporting the area with small scale investments for this purpose
 - providing tourists with authentic, educational and quality experiences e.g. by creating opportunities for them to interact with locals in an unstructured, spontaneous manner (e.g. through cultural activities and participation in local festivals and events etc.)
 - dealing with tourism seasonality as the proposed routes will also take into consideration different seasons' advantages and drawbacks and be accordingly oriented
- Finally, the partner's network of stakeholders and the Local Support Groups that will be created for assure tangible results, such as the strengthening of the tourism economy, in-depth knowledge of the integrated local resources with cultural&natural related assets, activating new font of job for the purposes of integrated management of the tangible and intangible resources of the territory.

B.2 METHODOLOGICAL APPROACH

B.2.1 Project methodology/Roles - Tasks of Beneficiaries

- Describe the methodological approach of the project and provide a brief description of all the work packages composing the project and their objectives. Please also identify activities' interlinks (sequence, combination, interrelation between activities-deliverables).
- Please include explanation of how will Beneficiaries be involved in the project (who will do what).

The maximum total number of characters is 5000
(please do not exceed 1000 characters in each box)

Number of characters 4729

The project's duration is 24 months.

The project core implementation starts with WP3 and the collection & recording of the touristic routes. LB, PB4, PB5 are responsible for the collection of environmental & cultural information regarding the implementation area and the drafting of a common study including the characteristics of the intervention zone. The study includes explicit information such as maps of the area, character of the area, natural environment, land use, spatial - urban planning, cultural environment, human activities, local products, natural features, etc. This deliverable comes as the basis for the next ones which are the election of routes& mapping. LB will propose a minimum of 30 differentiated routes including mapping, route description, detailed photographic survey, storytelling& myth collection. PB2 will cooperate with LB for the choice of Routes in the Region of Western Greece.

PB4 has pre- identified its 8 routes which are: palude del Conte, Salina Monaci,bosco Cuturi, fiume Chidro,c.da Marina.PB5 has pre-identified its 13 routes which are: Il Pulicchio di Toritto, Pulicchio di Gravina, Pietre Tagliate, Il Castello del garagnone, Lama viola Graviglione, Margetta Rossa, Pulo di altamura, Piano D'Annaia, Casette di Castiglione, Vetta Alta Murgia, La Murgia di Montegrosso, Foresta Mercadante, La Plana di San Magn. All the routes are inside protected areas of the natural reserve. PB3 will give directions for the needed input for WP4 regarding photographic survey, story& myth collection. LB (in cooperation with PB2), PB4 and PB5 will also identify 7 wheelchair-accessible hiking trails for people with disabilities. For further assistance of people with kinetic problems and special needs, LB, PB4 and PB5 will set up small scale investments in order to create 3 pilot TRAVability Routes specially modified. 3 routes will be created in Greece and 2 routes in Italy.

Finally Smart QR codes signs will be used for the signing of the implementation area. LB will use QR coding in every Municipality under its jurisdiction, PB4 will use 50 QRs, (5 dynamic QRs per 10 routes). PB5 will use 78 QRs (6 dynamic QRs per 13 routes), During WP4, PB3 will develop a web-based map platform (SMART MAP+) which includes the production of multimedia map based on Point of Interest data stored manually in excel files. In this action the interface will be extended to include paths and to allows people to input data using a new web-based tool as follows: partners to input basic data about trails (paths and Point of Interest); individuals to add memories (images and short video) about a Point of Interest next to trails (see 5.x.1) to enrich their knowledge; users to build their own trails based on the PoI available LB, PB2, PB4 and PB5 will be responsible to input basic data about trails (paths and Point of Interest) collected in WP3 using the web-based platform (4.x.1).

PB3 will also develop an on-line crowdfunding platform conceived with a modular system architecture. During PB5 which is devoted to the creation of a sustainable tourism management tool, LB, PB2, PB4 and PB5 will organize student contests for the knowledge enrichment of the Point of Interest: school classrooms will collect memories (images and short videos) of PoIs next to trails available in the map platform and will input them on the web-based map platform. PB3 will be responsible to realize virtual tours and 3d models of the 2 winning PoI to better enrich their knowledge, giving a graphical base for develop a renovation project All the materials developed will be added to the pertinent PoIs in the web-based platform. LB, PB2, PB4 and PB5 will be responsible for the organization of a crowd funding campaign to fund rising through the crowd funding platform created in previous WP for the pilot renovation project after the project completion, assuring the continuity of the action.

All partners will organize pilot walking and visiting experiences for professionals and tourism stakeholders, so as to better acknowledge the areas opportunities and to collaborate with local businesses. PB2 will create an evaluation platform for the implemented routes for tourism stakeholders, so as to evaluate the routes and give their professional feedback. For better understanding of the new approach of tourism self and community involvement, PB2, PB3, PB4, PB5 will organize 4 training seminars for public servants in order to promote& create tourism sustainable models. Presentation of del. 5.2 which will be given to them after the implementation of the project in order to use it. The seminars will be done with assistance from the Local Support Groups created during the community based events of WP2.

B.2.2 Roles - Tasks of Associated Partners (if applicable)

In case of associated partner, determine the project partner to which the organisation is related to (if applicable)

In case of associated partner, describe the organisation's role in the project (if applicable)

B.3 MANAGEMENT

B.3.1 Lead Beneficiary and Beneficiaries' Competence (Experience, Structure, Personnel, Resources, etc.)

- Which are the organisation's competences related opt the project activities?
- Which is the institutional and financial capacity?
- Which are the experiences relevant for the project?
- Which is the organisation's capacity to directly or indirectly influence local/ regional/ national policies?
- What are the reasons for the selection of Lead Beneficiary?

(please do not exceed 1000 characters in each box)

Number of characters 3826

The Regional Union of Municipalities of Western Greece (LB), is located in Patra, constituting a body governed by public, operating according to the provisions set in the Presidential Decree 75/22-8-2011. The main objectives of the organization are the establishment of cooperation among the municipalities of western Greece, the promotion of the 1st degree administrative institutions, the research and study of local administration, the collection and valorization of data concerning the member municipalities and their projects, the enhancement and support of initiatives aiming at local development. LB includes 19 municipalities-members of the union and Its administrative board is composed of 21 members, including the president. The Union has participated in several cross-border projects such as: ICE (Greece-Italy 2007-2013), Ci-Pro effect, "Talking Lands", "No Barrier", "CESAPO", etc.

LB is composed of all the necessary personnel and the competent departments for the management, monitoring and evaluation of its activities. The fact that it represents all the municipalities of Western Greece, holding a strategic position for national policies, its ability to directly influence them and its long experience on cooperation programmes are the reasons why the Union was selected as the LB of the project. The Development Company of the Region of Western Greece (PB2) is located in Patra, while it holds branches in the Regional Unites of Ileia and Aitolokarnania as well. The Company constitutes a Local Action Group, aiming at promoting, supporting and implementing development projects for public, social and private sectors. PB2 is composed of 9 thematic departments, responsible for the administration, financial management, planning, and topics such as support of enterprises and environmental protection. The departments are supervised by the three relevant directorates,

which are administrative and financial services, planning and programming, geotechnical, construction and environment. PB2 plays an important role in local development initiatives and the participation in the project will enhance its role in tourist development. ITC-CNR (PB3) is involved in 'Survey and enhancement of the built environment, including impact mitigation' R&D area, using laser scanner and drone, producing innovative multimedia interactive mapping. PB3 is composed of 4 research departments, 6 departments of support and 3 laboratories, while its employees 22 Professional Collaborators; 38 Technicians; 12 Administrative Staff. By participating in the project PB3 will be able to introduce new innovative technological means in tourist services. The Regional Controlled Nature Reserves of the Eastern Taranto Coast (PB4) was established in accordance with art. 6 of the law 24.06.1997, n. 19 and L.R. n. 24 of 23.12.2002

The institutive purposes are to promote education, training and scientific research, as well as eco-friendly recreational activities and redevelop economic activities particularly with a focus on tourism. The regional law n. 10/2006 entrusts the final management of the Natural Protected Reserve to the City of Manduria. PB4 is composed of 1 Managing authority, 1 Director e project manager, 2 administrative staff e secretary, 1 finance office. The National Park of Alta Murgia (PB5) is one of the biggest national parks in Italy aiming at the preservation of animal or plant species, plant or forest associations, geological singularities, the promotion of educational activities, training and scientific research. PB5 is composed of the following sections and staff: Director, Technical Service Unit No. 5, Financial Service Unit No. 3, General Affairs service Unit No. 4. By participating in the project PB5 will have the chance to support its objectives and promote educational activities.

B.3.2 Project management and coordination (structures, decision making procedures, internal communication, etc.)

Describe how the management on the strategic and operational level will be carried out in the project, specifically:

- structure, responsibilities and procedures for the day-to-day management and co-ordination;
- communication within the partnership;
- reporting and evaluation procedures;
- risk and quality management

The maximum total number of characters is 2000

(please do not exceed 1000 characters in each box)

Number of characters 1990

The objective of the management and coordination activities is to guarantee the procedures permitting the attainment of the objectives and an effective schedule of the activities. The Schemes to be organized are:

1. Transnational Coordinating Committee consisting of the project coordinator & 1 responsible representative for each partner. Task is to define the executive planning and the detailed programme of the project activities; to analyse and evaluate the development of the project activities and their coherence with the scheduled objectives and the expected results; to discuss and decide about possible changes of the project

The TCC will be set up during kick off and will draft a quality assurance plan in one month period and evaluate it after 12 months and at the end of the project.
2. the Project Coordinator, appointed by the Lead Partner. Task is: to call and chair meetings of the TCC; to set the agenda of meetings of the TCC; to subscribe the progress reports of the project

3. Local Management Unit, internal staff for each partner consisting of at least two units, one administration and one management. Task is to guarantee the effective and proper implementation of the activity; to guarantee the respect of rules and procedures of the programme, as well as the directions worked out by the TCC; to care about the administrative management of the activity; to prepare the administrative and accounting documents.

4. Monitoring and Evaluation Expert appointed by the Lead Partner. Task is to arrange and evaluate the project progress state with regards to the objectives and expected results through questionnaires that are going to be filled in by each partner and presented to the PC and TCC. The partners will meet at least 5 times during the project. They will have skype meeting every 15 days and will communicate in weekly basis via e-mail, telephone and skype (if needed), an open source collaboration tool specifically made for the project and viber group.

B.4 B.4 INFORMATION AND COMMUNICATION

B.4.1 Information and Publicity Strategy

Please describe i. the basic structure of the Project's Communication Plan (timetable, milestones etc), ii. the information and publicity measures to be carried out (website, events, publicity material etc) iii. the means of communication to be used to disseminate the Project's outputs, results and achievements (social media, brochures, promotional material etc) and iv. how the anticipated project results are going to be promoted at a national and/or at a regional level.

The maximum total number of characters is 3000

Information and Publicity Strategy is based upon the partners' capability to involve and to an active participation.

The main goals are:

- to inform audience about planning activities;
- to involve and to look for the fidelity of the audience;
- to create a trusting relation between partners and stakeholders;
- to disseminate the main results of the project;- to give visibility to the Interreg Programme. Each partner is in charge of a specific budget for the communication and dissemination activities, as well as for carrying out parts of the activities as scheduled in the application form and later the communication plan and that will also be stressed out in the partnership agreement.The communication strategy as well as having the goal of institutional communication will start also a process of territorial marketing, since the enhancement of the territory and the increase of its competitiveness are among the objectives of the Project.

For this reason the Communication Plan will be developed in the key of territorial brand promotion. LB will develop the overall plan and will acquire from all partners their local background, in order to better identify the key elements to be included in the plan. All project partners will be responsible of diffusion of materials as well as the management of the press office, Web 2.0 and media, in order to more easily achieve the strategic purpose of the widest possible dissemination of the project. Material like leaflets, newsletters and brochures will also support the more effective publicity of the project's scopes and results. They will create awareness of the project impacts and give a quick highlight on its relevant objectives. Media events like press conferences for journalist from TV and newspapers can be organized to provide information on the activities carried out during the project lifetime and promote the actions' achievements to the non-specialized general audience,

highlighting the benefits to society. The public is also one of the important targeted groups for the communication of the project and its results. These activities will take place in Italy and Greece. In particular the communication actions aimed to promote the contest of ideas will be an important opportunity to diffuse the findings of the project. The 20 Community building events involving local stakeholders that will be organized in each one of the partners as well as the final conference will provide the opportunity to disseminate the findings of the project. Each event at the end of the project will create a local support group that will adopt the created routes/ trails. The LSG could contribute to pan-European initiatives for cultural heritage preservation and promotion (European Heritage Label; Europa Nostra Awards). For their internal communication beneficiaries will also use an open source collaboration tool through which they'll be able to access common reference documents.

B.5 PROJECT READINESS

B.5.1 Preparatory and administrative activities undertaken

Describe the maturity of the project in terms of completion of the administrative procedures that allow the implementation of the project i.e. licenses, designs, permits, land acquisition, tenders documents, etc. This information should be provided for all project activities (services, equipment, infrastructure).

The maximum total number of characters is 3000

(please do not exceed 1000 characters in each box)

Number of characters

2386

The participating parties have discussed internally their participation in the proposed project and they have addressed a suggestion to their Councils, in order to approve their participation to the project. Regarding deliverables that require no external expertise or services, partners will partly assign the implementation of those deliverables to their staff, so that they can start the implementation of the activities undertaken immediately upon project proposal approval and project contracting. In the parts of the project where no hard infrastructure construction is foreseen, such as the pilot small scale interventions, there has been no need for administrative preparatory actions in order to start the deliverables implementation. Therefore no specific licenses or other approvals were needed by external bodies, so as to start the immediate project implementation.

For all partners the activities foreseen in the work plan of the project fall within the jurisdiction and scope of the partners, according to their legislative and regulatory framework. Yet, in order to further accelerate the beginning of the activities, partners have already contacted the necessary actions in order to avoid delays in the implementation of the project. Yet, the partners of the project have proceeded to several meetings during the preparation of the proposal, the first one of which was held in Italy, where beneficiaries had the chance to discuss the initial idea and the means that can be valorized for the implementation of the suggested activities. The second meeting was held in Greece, where Greek beneficiaries also defined the activities to be undertaken.

The integrated elaboration of the project's activities and outputs was facilitated by frequent Skype meetings and e-mails, as well as through a open source collaboration tools, through which beneficiaries could exchange fast and easily documents and all the required material for the development of the project proposal. Their interaction led to the creation of analytical methodological tools, describing the work flow between beneficiaries for the implementation of the foreseen actions, with reference to an accurate time plan. The procedures followed for the development helped beneficiaries to strengthen their cooperation, following coordinated steps that form the proper ground for the implementation of the project.

B.6 SUSTAINABILITY OF RESULTS

B.6.1 Sustainability, durability and transferability of main outputs delivered in the project

How will the project main outputs be further used once the project has been finalised? Please describe concrete measures (including eg institutional structures, financial sources etc) taken during and after project implementation to ensure the durability of the project main outputs. If relevant, please explain who will be responsible and/or the owner of the output.

How will the project ensure that the project's outputs are applicable and replicable by other organisations/regions/countries outside of the current partnership? Please describe to what extent it will be possible to transfer the outputs to other organisations/regions/countries outside of the current partnership.

The maximum total number of characters is 3000
(please do not exceed 1000 characters in each box)

Number of characters

1638

This sustainability plan of the project has been conceived in order to verify the most efficacious ways to give the maximum visibility to its outcomes to a wide range of end users and stakeholders, and to organize the fitting actions to reach this goal. It has also been conceived in order to keep the Project capable of continuing its effectiveness that is to say of maintaining its outcomes capable of developing new opportunities of music co-production under the favourable conditions that the Partners will guarantee after its conclusion. Each Partner of the Project will provide the Consortium with detailed information about: market scenarios for their standard products and their changing paths; potential of exploitation of the specific products developed during the Project; dynamics of the technologies (or, the technologies that are becoming more popular and the ones considered as 'obsolete'), etc.

Financial sustainability: the presence of strategic partners -public administrations management bodies- allow to look with confidence at the financial strengthening during the course of the activities. These partners can support by additional financial resources, the continuous of the touristic routes created and the activities implemented as they fall directly into their agenda for promoting their areas. The project presents remarkable attractive potentialities for successful sponsorships.

The crowd-platform that will be set up during the project give high sustainability as they engage a vast number of people and local stakeholders that can easily offer their experience and services to the success of the project.

B.7 CROSS-BORDER COOPERATION & ADDED VALUE

B.7.1 Cross Border cooperation

How is the cross border cooperation demonstrated in order to achieve the project's objectives and results? Please explain why the project objectives cannot be efficiently reached acting only on a national/regional/local level and/or describe what benefits the project Beneficiaries/target groups/project area/programme area gain in taking a cross border approach.

The maximum total number of characters is 2000
(please do not exceed 1000 characters in each box)

Number of characters

1740

Most of the partners have collaborated on previous projects, providing expertise, personnel and locations. During the realization of this project, the base was built also on the capitalization of previous collaborations either in co-funded projects or not. In previous projects with similar characteristics partners have been able to achieve a good level of knowledge of the territories, in the field of culture, nature and tourism. Just this knowledge has led the partners to identify the criteria with which to face the strengths and weaknesses that will be addressed during the project. At this point, with the application of the sequence of the project, the partners aim to employ the opportunity to capitalize on the positive results and make a step forward for the development of cross-border economic and cultural cohesion. Following the integration of previous experiences, this project aims to enhance all the positive results seen as a useful tool for sustainability of project actions.

After all the historic, cultural and natural environment of both countries will be a very rich source of inspiration and action in order to produce a result that will help the tourist development and along with that development in other sectors as well, for example the quality of inhabitants' life.

The project will connect a large cross border area using the historic, cultural and natural elements of both countries and promoting a sense of common identity. It will increase regional attractiveness and create the necessary conditions for a smart, sustainable and inclusive growth. In this way the business infrastructure and services and tourist development –the key sector for all cross-border productive systems- will be given a boost.

B.7.2 Intensity of Cross-Border Cooperation

According to Art.12 from 1299/2013 par.4 "Beneficiaries shall cooperate in the development and implementation of operations. In addition, they shall cooperate in the staffing or the financing of operations, or in both. Please select the applied cooperation with X and describe how this is achieved.

The project was jointly developed with all 5 partners defining the objectives and outcomes, the budget, the timing and tasks of partners, in order to ensure the objectives of the project will be achieved. The project will be jointly implemented, as partners will take coordinated steps for the organization of the co-productions and the setting up of the new touristic spot, ensuring the proper collection of the required material that will enable the connection of the selected areas.

B.7.3 Capitalisation

In which way does the project capitalize previous cooperation and experience (if applicable), especially in the Programme area?

- Capitalization of Beneficiaries' know-how experience
- Capitalization of Beneficiaries' experience in Cross border Cooperation activities
- Capitalization of previous cooperation among current Beneficiaries
- Capitalization of previous relevant projects

The maximum total number of characters is 1000

Number of characters 997

LB capitalizes on its experience on the cooperation projects "Talking Lands: talks between the lands of Apulia and Greece" and "NO BARRIER - New Objective: tourism without BARRIER" (Greece-Italy 2007-2013). PB2 capitalizes on its experience gained by the participation to the cooperation project Nat-Pro "Strategic Plans For Restoration, Protection & Eco Tourism Promotion In Natura 2000 Sites Which Devastated By Natural Disasters" (Greece-Italy 2007-2013). PB3 capitalizes on its experience and know-how gained by its participation on the SIRIAR Greece-Italy Project, by developing mapping tools for Corfu Municipality. PB4 capitalizes on the experience acquired by the project "Salento Network of Parks" and the "The Salento tells", funded by TPP. PB5 capitalizes on its long experience gained in projects such as: call-PO FESR 2007-2013 & LIFE+Biodiversity called "Control and eradication of the invasive exotic plant species Ailanthus altissima in the Alta Murgia National Park".

B.8 COMPATIBILITY WITH EU/NATIONAL POLICIES AND PROGRAMME'S CROSS CUTTING ISSUES

B.8.1.A Consistency of the project with EU horizontal principles

Please describe if applicable, the effect of the project to each one of the horizontal principles. Please select with an X only one option per principle and provide the justification.

Equal opportunities and non-discrimination (including provision of accessibility of disabled persons)

Please state if the project will :

The maximum total number of characters is 750

| <input checked="" type="checkbox"/> Consistent |
| <input type="checkbox"/> Neutral |
| <input type="checkbox"/> Non Consistent |

Strengthening equal opportunities and fighting every form of discrimination in societies, requires joint initiatives, which involve the rapprochement of cultures. The project contributes to the exchange of cultural and natural assets, involving joint initiatives between Greece and Italy, promoting tolerance & uniting cultural stakeholders, citizens & visitors, regardless of social, national and religious background, fostering freedom of expression and providing equal opportunities to young people engaging them directly to the creation of the common touristic routes. Special focus is given in ensuring accessibility for people with disabilities in outdoor spaces, with beneficiaries undertaking action for the creation of special needs routes.

Sustainable Development

Tourism is one of the world's fastest growing industries and an important source of foreign exchange and employment for many countries. Alternative forms of tourism such as self-involved tourism hold an important percentage of the travelling public, addressed to a wide number of people in the participating areas and worldwide. The utilization of technological applications, which will enable the connections of the different areas in the cross-border area, can lead to strengthening tourism, supporting local communities and their economies, suggesting special forms of tourism, which can act as drivers for jobs creation and the promotion of local culture and products, contributing in sustainability.

Equality between men and women

Please state if the project will :

As regards, equality between men and women the Regulation (EU) No 1303/2013, Article 7 (2), outline the promotion of equality between men and women. Program's implementation supports and promotes this common belief. The participation of an expanded target group in all implementation phases of the proposed project ensures among other things, participation equality between men and women. Indeed, after program's completion new jobs will be created, tourist economy and quality of locals will be boosted, regardless of any discrimination based on sex.

B.8.1.B Consistency of the project with cross-cutting themes

Please describe if applicable, the effect of the project to one or more cross-cutting themes. Please select with an X only one option per theme and provide the justification.

Investing in education, skills and lifelong learning by developing education and training infrastructure (TO 10).

The project foresees as main deliverable a student contest for the knowledge enrichment of the Points of Interest, creating a direct involvement between educational knowledge and the project. The community building events that will be organized by all partners, will educate local stakeholders, especially businesses related to tourism in the involved areas on how to integrate the initiatives to foster their productivity.

Enhancing institutional capacity and an efficient public administration by strengthening of institutional capacity and the efficiency of public administrations and public services related to implementation of the ERDF, and in support of actions in institutional capacity and in the efficiency of public administration supported by the ESF (TO 11).

Please state if the project will :

The project aims at enhancing the institutional capacity of the academic institutions related to music and cultural creativity as well as enhancing the institutional capacity of public administrations by organizing specialized training seminars and by creating an evaluation platform that lets stakeholders express freely an opinion on the project. Furthermore the support by LSGs created in the project will further enhance institutional capacity related to the problems tackled.

B.8.2 Contribution to other EU, National, Regional and Local policies.

Please describe the project's contribution or achieved synergies and complementarities with relevant EU/regional/national strategies, instruments and policies; in particular, those concerning the project or programme area.
The maximum total number of characters is 2000
(please do not exceed 1000 characters in each box)

Number of characters 1857

European strategy (Europe 2020) focuses among other things on smart growth in order to overcome the problems that the economic crisis has created. It aims to support the construction of key transport & ICT infrastructure, business infrastructure and business services, and tourism development.

The project will contribute to this aim giving innovative solutions to regional challenges. By revitalizing and transforming natural spaces with the establishment of new touristic hotspots will improve the cityscape and add value to the whole area. This will attract visitors, give a boost to the local economy and create new jobs. The main expected result of the project is the promotion of responsible and community-based tourism so that locals can enjoy increased socio-economic benefits and improved environment. A management plan to eliminate the barriers, challenges and accessibility of the above mentioned spaces shall be drafted.

Moreover, in line with PATH project goals, the Apulia Regional has regulated the development of local tourism with Program POR Apulia 2014-2020 and with the law 29/3/2001 n. 135 concerning the reorganization of the Apulian tourism system in order to encourage a process of exploitation of its heritage. PATH contributes to Greece's strategic development plan 2014-2020 for tourism contributing to T.P 2 for the enhancement of accessibility utilization & quality of information & communication technologies supporting the development of ICT products in tourism & T.P6 for the environmental protection & the promotion of resources efficiency including actions for the designation of environmental and cultural routes. Furthermore it strongly supports the smart specialization strategy of the Region of Ionian Islands & its priority for the promotion of special forms of tourism as a way to stimulate regional competitiveness.

B.8.3 Synergy with EUSAIR strategy

Please describe the project's contribution or achieved synergies, with the EU Strategy for the Adriatic and Ionian Region (EUSAIR).

The maximum total number of characters is 2000
(please do not exceed 1000 characters in each box)

Number of characters 1678

P.A.T.H keeps in line with the 4th pillar of the EU Strategy for the Adriatic and Ionian Region for sustainable tourism and specifically to its specific objectives for diversified tourism and sustainable and responsible tourism management. The project keeps in line with the aforementioned objectives and contributes in their realization, by suggesting concrete options of thematic tourism in the Adriatic and Ionian Region, with the set out of hiking routes and trails, while it manages to promote the sustainable tourism management with the valorization of ICT means, that enhance responsible tourism and allow visitors and users to enjoy the natural environment, reducing their impact on local biodiversity. Additionally the project responds to the goals set out at the EUSAIR brochure "For a prosperous and integrated Adriatic and Ionian Region",

Especially those regarding the establishment of a R&D platform with universities, research centers and the business community to develop new tourist products and services, and the promotion of new tourist routes for walking. This is achieved with the participation of a research Centre, specialized in ICT that helps the rest of the participating beneficiaries to enhance and update their tourist products, using new technological means and the definition of hiking routes. Probably the most important contribution of PATH to the goals of the EUSAIR 4th pillar is the definition of routes for people with disabilities aiming at improving their access to tourism products. An important part of its foreseen activities are dedicated to senior groups & students with the view to raising awareness for the environmental protection.

Lead Beneficiary Confirmation

By signing the Application Form the Lead Beneficiary hereby confirms that

- the project has not neither will receive any other EU funding (except for the funding indicated in this Application form) during the whole duration of its implementation.
- the project is in line with the relevant EU and national legislation and policies of the countries involved.
- all Beneficiaries in the Partnership receiving funding from the programme are eligible bodies as defined in the programme
- all Beneficiaries described in Section C of the Application Form are committed to taking part in the projects' activities
- the information is accurate and true to the best knowledge of the Lead Beneficiary
- The project budget and costs are in line with the limits set in the Call for proposals

Table 1		1st Call for Ordinary Project Proposals	
		Project level budget Rules	Maximum Allowed budget according to project budget (checked in Table 3)
Staff Costs (<i>Flat Rate basis Calculation</i>)		Maximum 20% of the total directs costs of the project other than staff costs and O&A.	136.288,06 €
Preparation Costs (D1.X.1)		Maximum 40.000€	40.000,00 €
Cumulative: i. WPX: Activities outside the programme area and ii. total budget of all Beneficiaries located outside the programme area		Maximum 20% of the total project budget.	172.789,53 €
		Beneficiary level budget Rules	Maximum Allowed budget of Beneficiary (checked in Table 4)
Office and administration expenditure Budget Line (<i>Flat Rate basis calculation</i>)		Maximum 15% of the total beneficiary's staff costs	Calculated in Column J of Table 4 for each beneficiary
Office and administration expenditure Budget Line (<i>Real Costs basis and Flat Rate basis calculation</i>)		Maximum 4% of the total beneficiary's budget	Calculated in Column J of Table 4 for each beneficiary
WP1: Management costs		Maximum 10% of the total beneficiary's budget, without including Preparation activities, any costs incurred for meeting, events, travel and accomodation of the beneficiary's staff and External First Level Controller.	Calculated in Column K of Table 4 for each beneficiary
WP1: Management costs		Maximum 15% of the total Lead beneficiary's budget, without including Preparation activities, any costs incurred for meeting, events, travel and accomodation of the beneficiary's staff and External First Level Controller.	Calculated in Column K of Table 4 for each beneficiary
WP2:Information and Publicity		Maximum 15% of the total Project budget, without limits at Partner Level.	Calculated in Column G34 of Table3

Project Details				
Project title:	Promoting Area Attractiveness through Hiking and Introducing a Different Touristic Approach			
Project acronym:	P.A.T.H.			
Priority Axis:	2. Integrated Environmental Management			
Specific Objective:	2.1 Valorisation of cultural heritage and natural resources as a territorial asset of the Programme Area			
Budget Limits of the project	Minimum budget	600.000 €	Maximum budget limits for the project per specific objective	1.000.000 €

Type of Project	Soft Projects
